

## RevoSport 10 Product Description:

Our 10mm deep 'RevoSport 10' is used beneath synthetic grass systems as a prefabricated shockpad. Bespoke widths can be manufactured. Length of roll will be made to the width of the pitch. This product is manufactured using Polyurethane trim foam and 30% reticulated foam to further aid with drainage and it is bonded together with a binder.

## RevoSport 10 Technical Specification:

Shock Absorption > 42% (+/- 3%)  
Vertical deformation > 5.4mm (+/- 3%)  
Energy Restitution > 39.1% (+/- 3%)  
Porosity > 12,000mm/h (+/- 3%)  
Tensile Strength MPa > 0.2 (+/- 3%)  
Elongation > 66 (+/- 3%)  
Overall Dimensional Stability <0.1% (+/- 3%)
