

### RevoSport 15 Product Description:

Our 15mm deep 'RevoSport 15' is used beneath synthetic grass systems as a prefabricated shockpad. Bespoke widths can be manufactured. Length of roll will be made to the width of the pitch. This product is manufactured using Polyurethane trim foam and 30% reticulated foam to further aid with drainage and it is bonded together with a binder.

### RevoSport 15 Technical Specification:

Shock Absorption > 51% (+/- 3%)  
Vertical deformation > 6.79mm (+/- 3%)  
Energy Restitution > 38% (+/- 3%)  
Porosity > 12,000mm/h (+/- 3%)  
Tensile Strength MPa > 0.15 (+/- 3%)  
Elongation > 70 (+/- 3%)  
Dimensional Stability <0.35% (+/- 3%)
