

RevoSport 20 Product Description:

Our 20mm deep 'RevoSport 20' is used beneath synthetic grass systems as a prefabricated shockpad. Bespoke widths can be manufactured. Length of roll will be made to the width of the pitch. This product is manufactured using Polyurethane trim foam and 30% reticulated foam to further aid with drainage and it is bonded together with a binder.

RevoSport 20 Technical Specification:

Shock Absorption > 59% (+/- 3%)
Vertical deformation > 6.9mm (+/- 3%)
Energy Restitution > 37.2% (+/- 3%)
Porosity > 12,000mm/h (+/- 3%)
Tensile Strength MPa > 0.23 (+/- 3%)
Elongation > 69 (+/- 3%)
Overall Dimensional Stability <0.04% (+/- 3%)

Test results are supplied by Labosport.
